Subject: EPA Site Page for Dimock

Humane, Trish and Rich:

In preparation for publication of the raw lab data (and other FOIA response information), below is a link to a Region 3 web page that we are setting up for Dimock:

<http://intranet.epa.gov/r3intran/hscd/Dimock/PAN000306785.htm>

We are using the Region 3 standard template for the basic look and feel of the site. Rich and Trish need to decide on the descriptive content they wish to present on this site in addition to links to the Lab Reports (and any other FOIA response information), Administrative Record and OSCnet etc. Please forward your content to me and I'll get it updated onto the page.

This page is currently ONLY accessible from the EPA Intranet until it is finished and has cleared all necessary reviews (i.e. the outside world can't see it yet.)

This page will provide the needed platform for making information available to the public (Public Reading Room) from an EPA Domain website (www.epa.gov)

ESC is making very good progress reviewing and re-posting raw lab data to the L:Share drive and the Records Center staff are reviewing and preparing to OCR, redact, merge and process for publication.

ISB is obtaining the needed information for loading the data we wish to publish publicly on the EPA ftp site (this is the Pavillion model.)

Please let me know if you have any questions or concerns.

Thanks,

Paul
